Subject: Docket Number 04-7984

This is concerning docket number 04-7984. I have had to accept second rate jobs my entire life because of my problem with paruresis. I have tried to submit a urine test so often they know me personally at one of the urinalysis centers. I have been working at a pretty good job for the last year and half which did not require urine testing well the company was sold to new owners and new owners want a urine drug test done before keeping me on. I suffer severe paruresis and at age 50 now all I see is doom and gloom ahead. Now I am at point of severe depression. New owners take over July 19th so I guess at age 50 with college degree it's washing dishes the rest of my life with no benefits. Something must be done about this requirement.
